

Figure 1. Schematic diagram of the experimental setup. The subject is seated in front of a computer monitor. The subject is asked to fixate on the center of the screen. The subject is asked to move the mouse to the target location. The target location is indicated by a red dot on the screen. The subject is asked to click the mouse button when the mouse cursor reaches the target location. The subject is asked to move the mouse to the start location. The start location is indicated by a green dot on the screen. The subject is asked to click the mouse button when the mouse cursor reaches the start location. The subject is asked to move the mouse to the end location. The end location is indicated by a blue dot on the screen. The subject is asked to click the mouse button when the mouse cursor reaches the end location. The subject is asked to move the mouse to the start location. The start location is indicated by a green dot on the screen. The subject is asked to click the mouse button when the mouse cursor reaches the start location. The subject is asked to move the mouse to the end location. The end location is indicated by a blue dot on the screen. The subject is asked to click the mouse button when the mouse cursor reaches the end location.
